Skills

HTML - CSS

Start with HTML and CSS, as they are the foundation of web development. Explain your understanding of HTML tags, semantic markup, and CSS selectors, and how you use them to structure and style web pages.

JAVASCRIPT - Node JS ... - React(I can learn fast)

Moving to JavaScript, I have experience with both vanilla JavaScript and popular JavaScript frameworks like React and Vue. I have leveraged these tools to create dynamic and interactive front-end experiences that engage users.

In addition to my front-end experience, I have a deep understanding of Node.js and its ability to run JavaScript on the server-side. I have used Node.js to create scalable and efficient web applications that can handle multiple concurrent requests.

MongoDB

my experience with MongoDB, a NoSQL database that works well with Node.js, has allowed me to design and implement efficient data storage solutions for web applications. The scalability, flexibility, and JSON-like document format of MongoDB enable me to store and retrieve data in an easy and organized manner.

Education

B.C Engineering

2020 | Tanta, Al Gharbiyah, Egypt, Egypt
B.S., Civil Engineering: Public Works Division

Languages

English

As a skilled communicator and language professional, I possess a diverse skill set that enables me to produce high-quality content in the English language. My expertise in English language is rooted in my ability to write error-free, academic texts, compelling articles, and engaging blog posts.
